

Priority Medical Training *is proud to offer*
The Difficult Airway Course: EMS™

Priority Medical Training is now offering The Difficult Airway Course: EMS for the Gulf Coast region. We now have classes forming in Alabama, Arkansas, Tennessee, Mississippi, and Texas. This is an intensive two-day course designed for paramedics, critical care transport nurses and other advanced level providers.

In this Course, you will:

- Learn the important airway algorithms and mnemonics.
- Use all of the proven airway devices in small group sessions.
- Practice decision making and airway techniques in Code Airway Stations.
- Face the most challenging patient scenarios in a no-risk environment. These include: elevated ICP, pulmonary edema, cardiogenic shock, status asthmaticus, foreign body in the airway, direct airway trauma, multiple trauma with shock, and many more.

Our didactic and hands-on training covers:

- RSI
- Prediction of the Difficult Airway
- Difficult Airway evaluation using video laryngoscopes designed for EMS
- Intubating LMAs
- Gum elastic bougie
- Surgical Cricothyrotomy: open and percutaneous techniques
- Combitube®
- King LT Airway®
- Pediatric airway management
- End-tidal CO2 detection
- Digital and nasal intubation
- Advanced laryngoscopy and intubation
- Capnography
- CPAP and BiPAP
